

Grand Theft Auto (GTA) – Beginner's Guide

1. Movement and Controls

Use the movement keys or joystick to walk, run, and explore the city. Learn how to enter and exit vehicles, switch cameras, and interact with objects.

2. Missions and Objectives

Follow the map markers to start missions. Missions help you earn money, unlock areas, and progress through the story. Always check the objective text on screen.

3. Driving Basics

Vehicles are essential in GTA. Practice accelerating, braking, and turning. Avoid crashing too often as it damages vehicles and attracts police attention.

4. Map and Navigation

Use the mini-map to find destinations, missions, and important locations like shops or safe houses. Set waypoints to navigate easily.

5. Wanted Level

Committing crimes increases your wanted level. Escape police by hiding, changing vehicles, or leaving the search area until the stars disappear.

6. Money and Equipment

Earn money through missions and activities. Use it to buy weapons, vehicles, or customize your character and equipment.

7. Save Your Game

Save regularly at safe houses or using quick-save options to avoid losing progress.
